## Summary

---

As a passionate Junior Full Stack Developer, I specialize in MERN stack, with a particular focus on React.js. My expertise encompasses building dynamic and interactive web applications using MongoDB, Express, React, and Node.js. I have a robust foundation in web development principles and a strong commitment to problem-solving using Object-Oriented Programming with Javascript, Java, C#, I am also a quick learner, adept at mastering new technologies to enhance web functionalities and user experience.

## Skill Highlights

---

- React.js: Building dynamic user interfaces.
- Node.js & Express.js: Server-side development.
- Databases:
  - NoSQL: MongoDB for scalable database solutions.
  - SQL: MySQL for structured database management.
- API Development: Skilled in creating and integrating RESTful APIs and JSON.
- Java Development: Experienced using Spigot framework for Java applications.
- Version Control: Skilled in using Git and GitHub for source code management.
- Learning Agility: Quick to learn and adapt to new technologies.
- Problem Solving: Strong analytical skills in troubleshooting and resolving coding issues.
- Object-Oriented Programming (OOP): Solid understanding of OOP principles to improve code efficiency and maintenance.
- Fluent in English with an APTIS certificate.

## Experience

---

- **Internship at Two Of Us L.L.C** (April 2024 - August 2024) as front-end developer .
  - Engaged in a four-months intensive internship completed multiple projects in React.js, developing dynamic web applications.
- **Freelance Web Developer, MERN Stack** (October 2023 - Present)
  - Independently manage web development projects using MongoDB, Express, React, and Node.js.
  - Deliver tailored solutions that enhance client websites and applications.
- **Minecraft Plugin Developer**
  - Specialize in using the Spigot framework with Java to create custom plugins for Minecraft game.

## Certificates

---

### Techlarious Academy:

Full Stack bootcamp in MERN Stack, MongoDB, Express, React, Node.

Intensive training bootcamp 07/2023-10/2023.

### Project:

**Healing Horizon Healthcare Project:** Developed a healthcare platform for streamlined appointment scheduling, online medicine purchases, and centralized medical records, enhancing user experience and service efficiency.

## Education

---

**BS in Computer Science- graduated in May 2024**

Arab Open University – Lebanon
